
760Li Visual Identification

The 760Li includes features previously introduced in the E66. Minor interior and exterior trim changes accompany the introduction of the N73, V12 engine.

The 760Li is distinguished from other models in the range by a discreet V12 logo on the front wheel arches, unique chrome kidney grill, new wheel design, and B pillars and exterior mirror stems finished in hi-gloss black.

The interior has been made even more luxurious with the center console, doors and dashboard all trimmed in Nasca leather. The dashboard also receives inlaid burr walnut trim. Alcantara roof lining has been added, as well as an illuminated V12 sill plate. However, the most significant difference is found under the bonnet.
